Educational background

Southeast University	Computer Science and Technology	2023/07 - present
Barishal City College, Barishal	Higher Secondary Certificate · GPA 3.83/5.0	2020/08 - 2022/12

Professional skills

- **Programming Languages:** C, C++, Python, Java (foundational proficiency in OOP and problem-solving), SQL, Assembly Language, JavaScript (Foundational/Learning).
- **Web Technologies:** HTML5, CSS3, JavaScript, responsive design principles.
- **AI & Deep Learning:** CNNs (MobileNetV2, InceptionV3), Transfer Learning, Digital Forensics (synthetic face detection)
- **Version Control:** Git, GitHub (repository management, branching, commits, SSH configuration)
- **Development Tools:** Visual Studio Code, IntelliJ, PyCharm, Android Studio, VMware (virtualization), Vercel, Netlify (deployment), CLI usage (basic scripting & navigation).
- **Database & Cloud:** MongoDB (basic CRUD operations), Firebase (Database & Authentication), Cloudinary (media storage integration), SQL database management.
- **Core Concepts:** Data Structures & Algorithms, OOP, Engineering Ethics.
- **Networking Basics:** Cisco packet tracer, IP configuration, subnetting, basic network troubleshooting.
- **Operating Systems:** Windows, Linux (Ubuntu, Kali Linux), WSL.
- **Project Experience:** HomZen (Android Application Development), Portfolio website development & deployment, AI-Generated Face Detection research & implementation.
- **Soft Skills:** Critical thinking, teamwork, communication, technical research writing, public speaking, self-learning, adaptability
- **Creative Skills:** UI/UX Design (Figma), Basic UI/UX sense, LaTeX-based document design

Work experience

HomZen	Lead Android Developer	2025/06
• Developed HomZen, a multi-service Android platform, leading the technical design and a modular UI system that increased code reusability by 50%. • Optimized Firestore synchronization using Batch operations, improving data consistency and reducing network overhead for real-time updates. • Integrated Google Maps and Location APIs to enable real-time service tracking and precise location-based discovery. • Implemented robust data validation and resource management, significantly enhanced application stability and overall performance.		

Project Experience

StreamWeb Platform
<https://streamweb-bd.vercel.app/>

Full-Stack Developer

2024/08 - present

- A responsive, modern multimedia streaming platform built with HTML, CSS, and JavaScript, designed for an immersive viewing experience.
- It includes core subsystems such as user authentication, content discovery, and real-time viewing progress synchronization.
- Using Supabase for backend integration enables secure user data management and persistent cloud-synced state handling.
- Custom-built UI components and a responsive dark-themed layout ensure consistency in interface design and a premium user experience.
- Implemented efficient DOM manipulation and asynchronous data fetching to optimize content loading performance for media-heavy pages.

Personal Portfolio Ecosystem
<https://kmsiam.vercel.app/>

Full-Stack Web Developer

2025/10 - present

- Developed a high-performance, responsive portfolio using Vanilla JS and CSS3, featuring a custom Canvas particle engine and 60FPS scroll animations.
- Optimized UI rendering using requestAnimationFrame and implementing a persistent Dark/Light theme system via LocalStorage and CSS Variables.
- Engineered interactive UI components including cubic-bezier counters, fluid typography (clamp), and a custom typing animation engine.
- Implemented a serverless communication layer using Formspree API with asynchronous form handling for a non-blocking user experience.
- Applied BEM methodology and asset optimization strategies to ensure cross-browser compatibility and sub-second page load speeds.

Faculty Review Platform
<https://facultyreview-bd.vercel.app/>

Full-Stack Web Developer

2025/12 - present

- Built a full-stack professor rating platform (React, Node.js, MongoDB) featuring secure authentication, dynamic reviews, and aggregated data analysis.
- Engineered an efficient React frontend for seamless rendering and dynamic processing of complex student-faculty feedback.
- Developed a robust Node.js RESTful API to handle complex routing and ensure smooth client-server data flow.
- Implemented a scalable MongoDB database architecture to securely manage and retrieve large volumes of academic data.
